

## Letter to the Judges

Asaalmao Alykoum judges my name is Islam Akkal and as you know I am a senior. I am seventeen years old and I have been in Michigan Islamic Academy since ninth grade. The experience has been an excellent one and I will remember my days here forever. My project is about building computers and why you should do it. For a couple of years now I have been very interested in computers and I was finally able to do some research and build my own computer. It has been an amazing experience and I am now pursuing a computer science degree. I got accepted to the University of Michigan-Dearborn and plan on going there next year.
